

Q: Why it can't display in the middle of screen, show as bellow:

A: Firstly, it is not a hardware problem.

This belongs to the Raspberry software system Setting problems, according to the following operation instruction set the resolution, can solve the problem.

Step1: Open the “config.txt”

```
sudo nano /boot/config.txt
```

Step2: Modified parameters as the following:

```
# uncomment if hdmi display is not detected and composite is being output
hdmi_force_hotplug=1
# uncomment to force a specific HDMI mode (here we are forcing 800x480!)
hdmi_group=2
hdmi_mode=1
hdmi_mode=87
hdmi_cvt 800 480 60 6 0 0 0
start_file=start_x.elf
fixup_file=fixup_x.elf
#gpu_mem=128
```

B: Secondly, **Note!!** please use the 8Gb micro sd card or more than 8Gb micro sd card; don't use the 4Gb micro SD card or less than 4Gb micro sd card;
